1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3,6-9, drawn to a development system and method of using this system such that the development system has an arrangement for supplying power to the developing roller and supply rollers, classified in class 399, subclass 285.
- II. Claims 4-5, drawn to developing rollers and their spacing from a photosensitive member, classified in class 399, subclass 265.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as not being used with the power supply arrangement claimed in invention I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Beatty whose telephone number is (571) 272-2130. The examiner can normally be reached on M-F from 9 to 6.
